Summer Solstice Celebration

6000 Jobs Under the Sun—Celebrating the Colorado Solar Workforce
Wednesday June 21st 5:30-9:00pm | The Colorado Governor's Mansion

We would like to invite you to sponsor our Summer Solstice Celebration of solar jobs! Colorado has experienced tremendous growth in its solar workforce - now more than 6,000 strong - and we want to invite you to help us celebrate that success and build for the future.

Our Summer Solstice Celebration will be on June 21st at the Colorado Governor's Mansion in the outside and carriage house areas. The event will focus on building solar camaraderie, educating guests about solar, and will feature live bluegrass music, lawn games, and food and drink.

We would like to have as many industry employees and customers at the event as possible. We are inviting member and associated employers to sponsor the event and to distribute tickets to employees and clients to show support of our growing industry.

This is a chance for all of us who care about Colorado's solar progress to come together and celebrate our success while building financial support for the challenges ahead in the policy realm. Together, we can continue building stronger solar markets and growing our industry into a mainstream energy source.

This event is being sponsored by New Energy Colorado, COSEIA's affiliated educational nonprofit association. Tickets and sponsorships are tax-deductible.
